

Press Information

Sept 2012

St. Paul's Cathedral is this year's venue for the Forum8 sponsored International one day Conference on 3D VR Simulation Tuesday 20th November 2012

Japanese 3D simulation specialists Forum8 are very pleased to announce the first annual Interactive 3D Visualisation Conference in London 2012.

This free conference is titled; ***"The Application of 3D VR Simulation in Urban, Transport & Emergency Planning"*** and is being held in The Wren Suite, St Pauls Cathedral, London on Tuesday 20th November 2012.

This inaugural conference will consist of a number of presentations from guest speakers from across the globe, covering many aspects of 3D VR simulation and visualisation and promises to offer cutting edge ideas and principals in this ever developing area of technology.

The conference will include speakers from:

Arup (UK), TomTom (Netherlands), BMIA (France), GTA Geoinformatik GmbH (Germany), Ordnance Survey (UK), SIAS Paramics (UK), Sunderland University (UK) and Forum8 (Japan).

For an invitation please contact Patrick@forum8.com

n.b. Space is limited so if you are interested apply soon

Background: Forum8's state-of-the-art 3D software VR-Design Studio (formerly UC-win/Road) is at the forefront of modern Interactive 3D Simulation technology and is the ideal solution for urban and transport planning & design projects, either on its own or linked with third-party civil engineering 3D design tools and micro-simulation applications.

It is also used extensively in human factors research, in conjunction with a wide range of drive simulators and for pedestrian and rail based VR projects.
