

## FORUM8 sign Premier Partnership Agreement with SIRADEL

**FORUM8 is very pleased to announce their latest Premier Partnership Agreement with French Geo-Data specialists SIRADEL**

**FORUM8** and **SIRADEL** have developed a seamless integration of **FORUM8's** award-winning 3D Visual Interactive Simulation software **VR-Design Studio** and **SIRADEL's** 3D City models.

This exciting new development of being able to offer pre-built **SIRADEL** 3D City models within **VR-Design Studio** will undoubtedly save a huge amount of time and money for **FORUM8** customers and partners alike who require an interactive 3D model of a town, city or streetscape as a part of a current or future project.

**SIRADEL** has been producing accurate and realistic 3D city models for more than 15 years and has built up a unique collection of 3D digital models of thousands of cities from all over the world. **SIRADEL** is a top-tier editor of geographical map data in the world and controls the whole production chain, from the image acquisition (aerial, satellite and terrestrial) to the post-production. **SIRADEL's** databases are updated on a regular basis – on average every three years.

The **RealCity<sup>3D</sup>** urban databases come in 3 levels of realism, with a metric geometric precision. **SIRADEL** has also developed a unique and operational Mobile Mapping System which automatically texture maps building's façades and monuments in a cost-effective manner for even more realism. This cutting-edge technology is an economically viable alternative for all who wants to increase the visual fidelity of their 3D city models on a large scale, for example for real-time pedestrian navigation, evacuation or driving simulation.

**FORUM8's** state-of-the-art 3D software **VR-Design Studio** (formerly UC-win/Road) is at the forefront of modern Interactive 3D Simulation & Modeling technology.

**VR-Design Studio** is the ideal solution for urban and transport planning & design projects, either on its own or linked with third-party civil engineering 3D design tools and micro-simulation applications. It is also used extensively in human-factors research, in conjunction with a wide range of drive simulators and for pedestrian and rail based VR projects.

Some of the ways **FORUM8** customers and partners will benefit from this new Agreement include:

- The availability of several thousand pre-built city models
- Offered in 3 different levels of detail
- Competitively priced
- Enabling improved and faster project workflow
- Improved project profitability
- Providing clients with an totally interactive and immersive 3D environments
- High Precision
- Multiple formats
- Expert support
- On-going development by two dedicated development teams
- Enable new usages
