Press Information 9th June 2011

1m Yen First Prize in new VR Cloud Based Design Competition

Japanese 3D VR specialists **Forum8** and German BIM software house **Nemetschek** have launched a unique design competition for Students...

Virtual Design World Cup

1 million yen to be won... Equivalent to \$12,000

...in the 1st Student BIM & VR Design Contest on Cloud Services

The competition, open to full and part time students, is based on the production of an innovative bridge using leading BIM and 3D VR software: **Allplan** by **Nemetschek** and **UC-win/Road** by **Forum8**. The software will be provided to contestants free of charge for the duration of the competition

All participants must be students (full or part-time). Solo and team entries will be accepted. Works created prior to 2011 will also be accepted so long as they address the theme of the competition and meet final deliverable requirements – see the Competition [website](#).

The organising committee consists of leading experts in the areas of 3D visualisation and engineering from some of the world's most prestigious Universities including: Harvard, Arizona, Greenwich and Tokyo.

- **Workshop Period** : June – September 30th, 2011
- **Final Submission Period** : October 1st – October 31st, 2011
- **Announcement of Results**: Friday November 4th, 2011
