...the latest Japanese 3D Visual Interactive Simulation Technology

*...for improved urban, transport, emergency & security planning,
drive simulation, public consultation and human factors research*

Virtual Design World Cup 2012

The Student VR & BIM Competition on Cloud

The theme of this year's competition is "The Sustainable Design of a Marine City"

Participants will use the latest state-of-the-art technology in Interactive VR, BIM and Engineering to design a sustainable and self-sufficient Marine City. This man-made city 'on the sea' should include innovative designs to overcome the problems all modern cities face in the 21st century

To be eligible, you must be a student – due to graduate after November 2012. Mature students are welcome!

The software that you will require will be provided free of charge. You will be provided with a list of available software once you have registered.

There will be a number of 'large' cash prizes along with the latest Japanese gadgets for the winners of this unique competition – so email for more information soon!

Registration opens on the May 1st 2012 – Closes Sept 30th

Submissions must be received between Oct 1st - Oct 23rd

Final Judging 20th November 2012

Please contact office@forum8.com for more information
